CASE STUDY

Challenges

- Manage the internal employees, that includes- training management, time management and some other internal tasks.

Our Solution

Solution

- As there were various requirements for different department processes to have different stakeholders, therefore, multiple applications were created to facilitate each team involved in it.
- Custom aura component was built to facilitate the management for the internal training.

Benefits

- The use of the time tracking system gave clear visibility to the users.
- Employees got visibility of their time sheets and thus, got the process of updation available on their finger-tips
